Cloud technologies
Bespoke software development
Business Training

With our founder still at the helm, along with an experienced and passionate support team, our trusted methodology allows us to focus on your individual business needs at a very personal level.

Working as part of your extended team, our approach is centred around helping clients embrace IT solutions to support business growth, inspire collaboration, increase productivity and drive greater customer engagement.

ERP Solutions
for your growing business

Paradise as your trusted Sage Partner
With over 30 years of experience and knowledge integrating Sage systems, you are assured of the best possible technical expertise and practical support for your individual business requirements.

Keep your edge & supercharge your growth
Sage 200cloud is a powerful business management solution that brings you the freedom to work how and when you want. Designed to manage your finances, customers and business insight with one solution — and propel your business to the next level.

Ideal for companies with a turnover of £1 million to £50 million, or typically 10 to 200 employees, Sage 200cloud works across all business sectors and delivers scope to grow.

Discover true business freedom
Manage your business on the move, with the power of a desktop combined with the freedom of the cloud. Providing real-time business insights and data integration whenever you need it, wherever you are.

Run a smarter, more connected business
There are a huge range of choices available to allow businesses with specific needs to pick and choose the modules relevant to their business. Sage 200cloud offers the choice and flexibility to fit the needs of your business as it evolves.

Access your data anytime, anywhere
Sage 200cloud makes it easy to access critical information when you're out of the office visiting customers or suppliers, and makes home working straightforward.

sage 200cloud

Financials - Managing your financial position
Know the financial position of your company at any point in time. Analyse historical trends and data to get accurate information to make critical business decisions.

Commercials - Supply Chain, Stock & Sales Orders
Sophisticated stock management linked to your financial data. Increase productivity by 40% by streamlining processes, improving efficiency, cutting costs and improving customer service.

Workspaces & Connected User - Data access
Improve data visibility and productivity with Workspaces and Connected User. Configurable, role-based workspaces enable you to access, manage and share business insight wherever you are.

Business Intelligence - Greater control
Plan strategically for growth and change with tools that help you identify key trends and patterns. Spot opportunities for innovation and identify improvements in productivity and growth in every area of your company.

Project Accounting - Keeping track
Sage 200cloud helps you control your costs and maximise your profits by understanding the detail of each and every project you manage.

Sales and Marketing - Pipeline management
No matter how, when or where your customers, partners and prospects interact with your business, Sage 200cloud helps you manage these important relationships easily and intuitively.

"The team at Paradise Computing exceeded expectations when they provided us with Sage 200. The Sage 200 software delivers the perfect solution to effectively link our sales, warehouse and financial management together."

Software Development

Solutions to suit your business needs
As experienced Microsoft and Sage application developers, we can design, develop and deliver the perfect bespoke software development service for your business.

Making your software work the way you want it to
We build powerful, complex, yet user friendly solutions to fit your business requirements. Having delivered multiple software projects across a variety of industries, we have a wealth of experience in working with customers ranging from small local businesses right through to large multinationals.

Technologies
Our dedicated in-house team members are experts in web, mobile and desktop application development.

Our highly skilled and knowledgeable professionals also have experience across all Microsoft platforms and languages, including ASP.NET, JS, AngularJS, MVC, Xamarin, .NET Core, SignalR and Azure.

Portability and Freedom
Paradise do not tie you in contractually. We will not withhold your data, meaning you can request the source code for your own software at any time.

Enhancing
your systems

Rapid Application Development
Since 1987, Paradise has developed hundreds of applications, providing a Rapid Application Development (RAD) approach to software design, development and testing. This ensures you receive high quality individual solutions that are delivered on time and on budget.

Keeping it personal
There are many advantages to commissioning your own bespoke software. Personalised solutions can be adapted to suit your changing business needs, with custom add-ons specially designed to be compatible with your existing systems.
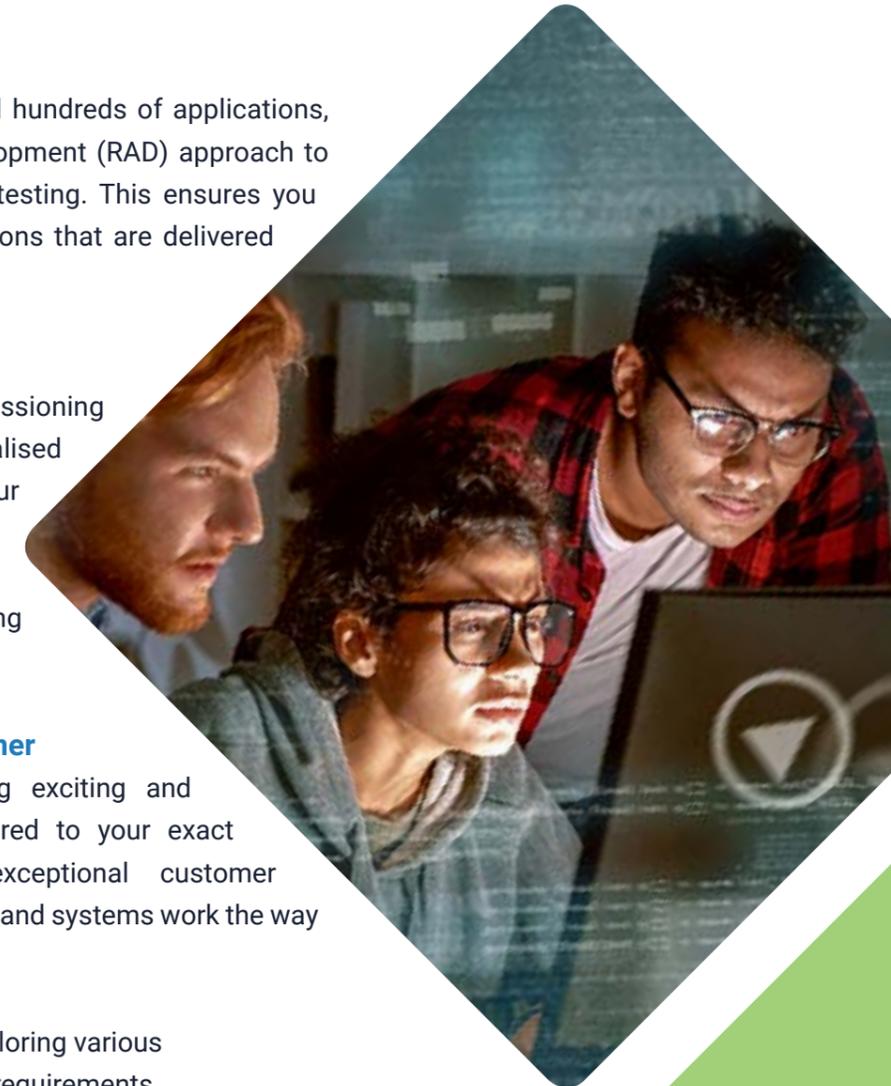

Paradise Computing as your Partner
Our focus is always on delivering exciting and innovative software solutions, tailored to your exact requirements, along with an exceptional customer experience. We ensure your software and systems work the way you want them to.

Call us on **01604 655900** to start exploring various solutions or to discuss your specific requirements.

"Paradise Computing turned a suite of problem solving ideas into a bespoke piece of software development, a web based application with an SQL Database, to record time logging activities against Sage 200 BOM operations."

IT Services

Microsoft Gold Partner

As a Gold Partner, we are one of the top one percent of Microsoft elite partners worldwide. Each and every one of our clients understands the critical importance of the right business partnerships for the success of their business and this is why they partner with us.

From supporting your on-premise infrastructure, to provisioning entire cloud-based solutions, as a Gold Partner, Paradise Computing has the experience, expertise and backing to help you achieve more.

Paradise can help you evaluate all the available options to support your current and future systems.

ISO 27001 Certified

ISO 27001 is the only auditable international standard that defines the requirements of an information security management system (ISMS).

Our certification demonstrates that we have defined and put in place best-practice information security processes and work within a globally benchmarked framework.

"As a market-leading supplier of food processing machinery, service & consumables, Cutting Edge Services first partnered with Paradise Computing in 2017 to provide Sage 200 support to our UK and Ireland operations. After being impressed with their refreshingly straightforward approach we migrated to a fully hosted private cloud solution in February 2019. The project was wide reaching, impacting every area of our business but was well managed and delivered both on time and within budget.

The private cloud platform has exceeded our expectations. At every stage throughout our relationship we have been delighted with the outstanding support and training offered by the Paradise team who have been professional and customer-focused throughout. We look forward to continuing to grow our partnership with Paradise in the future as we extend our cloud-first IT strategy."

Cutting Edge Services

Expand
your team's bandwidth

Support Services

Our mission is simple: to swiftly resolve your IT issues and action your support requests as efficiently as possible. We work with computers, but ultimately we are people who help people and we value the reassurance of giving you a friendly human voice at the end of the phone.

By inviting us to work as part of your extended team, you also benefit from expanded support capabilities, reduced operational costs, protected capital expenditure and lower IT operating expenses.

Staying ahead

Technology evolves at a lightning-fast rate. We help you keep up with the changing requirements of your maturing business by providing predictable controlled costs, increasing efficiency, direct access to specialist expertise, greater uptime and up-to-date software and technology.

Scalability

Gain the flexibility of being able to quickly scale your resources up or down as your business evolves. We don't just know IT, we also know business. We share this experience to keep our relationship growing, together.

Everything you need
Everywhere you go

Cloud Hosting

Having access to your business data and applications, anywhere, anytime, from any mobile device, opens up a whole new world for your business, your employees and your customers. Benefits include:

Cost
Eliminates capital expense of buying hardware, software, setting up and running on-site data centres.

Speed
On demand resources give greater flexibility and take the pressure off capacity planning.

Global scale
Delivering the right amount of IT resources when needed, from the right geographic location.

Productivity
Removes the need for "racking and stacking", hardware set up, software patching and time consuming IT management chores.

Performance
Secure data centres, regularly upgraded to the latest generation of fast and efficient computing hardware.

Types of cloud computing
Public, Private, and Hybrid. Not all clouds are the same. We help demystify the options and find the right solution for your specific needs.

"We have worked with Paradise Computing for over 10 years. During this time, the team has successfully provided Sage and LAN support for both our head office and pubs. Most recently, the Paradise Computing team has made sure that the management of migrating our company to the cloud-based Office 365 has run efficiently and smoothly.

Paradise Computing is a very professional organisation. The nature and size of the company allows the team to remain completely customer focused; ensuring that they have the ability to react to your needs immediately either over the phone or in person."

McManus Pub Company

High Confidence
Trusted cloud migration

Having decades of experience helping customers adopt new technology, we understand how challenging it can be to transition business-critical investments to the cloud. Our goal is to ensure customers know their migration options, feel confident during migration, and ultimately set up their business for low-friction Azure adoption. Join thousands of customers who are migrating to Azure using a proven and trusted methodology.

Paradise will support you to:

Assess
Migrate
Optimise
Secure
Manage

Microsoft 365

Transformation to a modern desktop helps you to foster a highly secure workspace, empowered by the latest productivity, teamwork and collaboration experiences for your organisation. Making the shift also removes much of the pain of keeping your desktop environment secure with built-in end point protection and easier access to the latest security updates, as well as improved information protection and integrated identity and access management.

Ensure you are always up to date, on all your devices, wherever you are. Ask us about the many benefits of Microsoft Office 365.

Training
for your business

At the heart of your organisation
Based in the heart of Northamptonshire, East Midlands, Paradise offers business training courses from our dedicated training suite on the beautiful Althorp Estate in Northampton, as well as closed sessions, one to one and half day workshops at your place of work. Our experienced and engaging training team are based in several areas throughout the UK and can travel to a location that is convenient to you.

Learning culture
We develop and deliver a meaningful learning experience for you. By utilising our free Training Needs Analysis, we help identify skills, knowledge and behaviours that will directly support the strategic aims and functions of your organisation.

Impactful delivery
By combining expertise in learning, subject matter and industry knowledge, Paradise creates innovative, high impact and relevant learning to help you develop essential business skills, knowledge and behaviours that are readily transferable to your workplace.

We specialise in Microsoft Courses, Professional Development and Sage. We can also design or source specialist courses by request, just let us know what you need.

"Paradise Computing has been providing us with MS Office classroom training for 10+ years. I have been very impressed with the quality of the training. All of the feedback is positive from our customers and the trainers are very knowledgeable on their subject matter, very reliable and professional in how they deliver the class room session. Communication with Paradise has also been excellent when liaising with them about course planning and delivery. They are always happy to meet up, offer bespoke training and have the ability to adapt their training to suit the needs of the learner in the classroom. I cannot recommend them highly enough."

LGSS Learning and Development Trainer Advisor, Northamptonshire County Council

Supporting you
our leadership team

Jonathon Berg - Managing Director

Jonathon is a long-time IT industry professional having gained a Computers and Cybernetics degree in 1983. After spells helping set up early-adopter computing companies in London during the 1980's Jonathon was a founder director of Paradise Computing Ltd enabling the company to make best use of his Development, Project Management and Consultancy skills. Jonathon is also Microsoft, Sage and Prince II certified.

Anthony Lester - Director of Software Services

Anthony heads up our software team and is highly respected for his knowledge and work ethic. Anthony joined Paradise in 2004 and, having worked with Sage 200 for nearly 20 years, knows more about the product than most people alive. His combination of development skills and product knowledge make him the best resource in regard to knowing what is possible with the Sage 200 software and how to approach difficult challenges.

Kevin Ritchie - Development Team Leader

Since joining Paradise in 2006 as a developer, Kevin has worked his way up the ranks to head up the Development Team. His deep knowledge of development tools and platforms, including Visual Studio, .Net, C#, SQL and Azure, built up over 20 years, mean he is highly respected by his team. His experience in developing stand-alone products as well as Sage 200 add-ons means he can accurately forecast timescales and challenges for any development project.

Dominic Saunders - Infrastructure Services Team Leader

Dominic provides a calm and assured service to all our customers through his knowledge of Azure and other cloud-hosting technologies. As an early adopter of both cloud and Azure, Paradise is proud to offer a best-of-breed service around cloud delivery and Dominic ensures that his team addresses all the issues that arise to ensure the availability, integrity and confidentiality of our customer solutions.

Karen Love - Operations Director

Karen heads up the back office at Paradise and oversees the smooth running of all the internal systems including Finance, HR, Office Management and Training. Despite being warm and courteous with everyone she deals with, her reliability, efficiency and attention to detail is legendary and as a result Paradise runs as a tight ship and cost-efficient business, bringing benefits to staff, suppliers and customers alike.

Our passions   #doITbetter

We are more than just Paradise employees. We take ownership of what we do and we all have a vested interest in the success of our company, your business and our community. Together we work towards making better outcomes for us all.

We enjoy supporting and encouraging the many events, sporting activities and charitable endeavours of our team members and customers.

Our community is important to us and we give back through helping organisations like Rotary and the Limbless Association. We also offer free training courses for Right Resolution CIC, to support their amazing work helping Care Leavers aged 16-24 to reach their aspirations in education, employment and training, whilst boosting their confidence and self-esteem.

We are also proud to be associated with our local professional and grass roots sports teams, including Northampton Saints Rugby Club and Northants Recreational Cricket, sponsoring one of our youth County Cricket teams.
