

DEVICE-AS-A-SERVICE

A scalable and manageable approach to device purchasing and deployment.

WHAT IS DEVICE AS A SERVICE?

With remote working and dispersed teams on the rise, organisations are in need of flexible device solutions, especially when it comes to purchasing and deployment. That's where our Device-as-a-Service (DaaS) comes in.

If you need new hardware to support your tech-first workforce, you can eliminate high up-front costs by breaking down your device purchasing into smaller, regular monthly payments.

At a lower monthly rate than finance, our DaaS solution allows you to lease business hardware, for as little or as many devices as required, with one transparent monthly payment.

WHO IS IT FOR?

- Any organisation looking to update or improve their hardware, without large up-front costs.
- Any organisation with distributed teams that wants to standardise the technology across their workforce.
- Any organisation where growth is a priority and require a flexible device deployment solution, to support their long-term plans.

HOW DOES IT WORK?

STEP 1

Simply choose the hardware and accessories you need to support your team.

STEP 2

Once your choice has been approved, we'll source and supply your new hardware for you.

STEP 3

If needed, we'll even set up your devices for immediate use.

STEP 4

After 3 years, you can hand back your devices and upgrade to the latest version - It really is that simple.

KEY BENEFITS

Reduced up front costs

Utilising our efficient subscription service will keep cash flow within your business, whilst reassigning costs previously used for capital expenditure.

Through a low fixed monthly fee, your workforce will be equipped with the most suitable hardware, without the burden of an upfront cost.

A scalable solution

In regularly upgrading to the latest innovative hardware, you can be confident that your devices will align with your business growth and technical needs.

Bundle your plan

With Stripe OLT, you can group your device purchasing, and align hardware needs with additional project or IT requirements.

ADDITIONAL SUPPORT SERVICES

Office Moves

Whether you're downsizing your office, adopting a flexible working structure or require larger premises, without a well-defined relocation strategy, the process of moving office can quickly become overly disruptive, adversely affecting productivity, staff engagement and even profitability.

Back Up & Disaster Recovery

Whilst restoring and protecting data undoubtedly go hand in hand, disaster recovery is about far more than just backup. Not only are there now ever-present cyber-threats growing in complexity each day, it is also important to recognise that data loss can be additionally caused by human error, hardware failure or natural disasters.

Managed Cloud Support

With the continuous growth of technology, opting for a Managed Service Provider to support your cloud infrastructure is becoming increasingly popular. Through adaptable, bespoke cloud solutions, your business can take advantage of the performance, scale and resilience that cloud technology offers, without exercising your own internal time and resources.

Strategic CTO Consultancy

Stripe OLT's transformative consultancy support provide you with the strategic oversight, operational planning and board level advice of a Chief Technical Officer, without the commitment and expense of hiring a full time senior executive. Our experts are here to help you to prioritise projects according to your budget and to establish plans for the short and medium term.
