

MIGRATING YOUR BUSINESS TO THE CLOUD

With resilient and agile cloud Microsoft technology.

With the continuous growth of technology and increasing remote working requirements, migrating your business infrastructure to the cloud is becoming an essential business need.

Through adaptable, tailored cloud solutions, you can take advantage of the performance, scale and resilience that the cloud computing environment offers, without exposing mission-critical applications and data to security risks.

As Microsoft Azure specialists with advanced certifications and accreditations, we have the strategic skills required to support a variety of cloud adoption needs – whether you’re looking to take the first step with an on-premise, hybrid migration or dive in with full cloud migration, our experts are here to support your initiatives.

WHO IS IT FOR?

Our Microsoft Azure cloud solutions are for any business looking to thrive in today’s digital landscape, particularly if productivity, continuity and scalability are a top priority.

KEY BENEFITS

Scalability

In replacing your on-site infrastructure for a virtual alternative, underpinned by Microsoft Azure, your business is empowered to take a truly agile approach, keeping up with the latest cutting-edge technologies and hardware to facilitate your business growth.

Continuity

Backing-up your data should be an essential part of your business's continuity plan, there to protect your data against breaches and natural disasters. In trusting our Microsoft experts to deliver a resilient cloud solution, you can be confident your business data is backed up and stored securely.

Security

You can be assured that your data is protected through state-of-the-art security technology. Our expertise in cyber security, underpinned with our bespoke knowledge of the Microsoft stack, enables you to benefit from a tailored plan employing enterprise grade security tools to guarantee the protection of your business data.

Affordability

Employing our team of industry-leading experts to migrate you from an on-premise environment to cloud or hybrid environment will undoubtedly result in major cost savings. Paying flexible monthly fees for a digital infrastructure, rather than investing in aging hardware will allow you to see a quick return on investment.

Accessibility

Your employees are empowered to work anywhere, from any device, allowing you to witness a reduction in downtime and an increase in employee efficiency.

OUR WORKING PROCESS

1

Before starting your migration, our team of Microsoft experts provide an in-depth discovery and audit of your current infrastructure, in order to assess which applications should be migrated to the cloud and if any systems should stay on site.

2

Once this has been carried out, we'll perform a GAP analysis to benchmark your current technology against your ideal requirements.

3

Utilising all of the information collected during the two previous stages, and in keeping with your business strategy, our technical team design your project road map.

4

Then we'll build and implement. Prior to implementation, we rigorously test any new systems before we migrate live technology – here we work alongside your team to ensure everything is running efficiently before we launch to your wider team.

5

We plan in parallel with your normal working practise and the final cutover is scheduled for a time convenient to your business, in order to ensure a smooth implementation.

WHAT DOES IT COST?

Depending on the solution you need and the software applications you select, costs will vary. We consider:

- The number of users
- The amount of data on-site
- The complexity of distribution groups, mailbox rules and permissions

In partnering closely with your business, our Microsoft experts are able to provide you with a flexible and personalised plan built to your requirements.

WE'RE AN ACCREDITED CLOUD & SECURITY PARTNER

Microsoft - Gold Certified Partner

Our Microsoft Gold-Certified cloud consultants have direct access to the latest Microsoft training, qualifications and tools; which means our workforce are not only experts in their field, but are equipped to deliver and implement industry leading secure, cloud technologies.

CREST - Penetration Testing Certified

In achieving this globally recognised accreditation, we've positioned ourselves as a leading provider of penetration testing services. In undertaking these stringent assessments we have demonstrated that our business processes, data security and testing methodologies meet the highest standards.

Cyber Essentials PLUS - NCSC Certified

In gaining this practitioner status, our team of experts are ideally placed to support clients with their own accreditation journey, whilst additionally giving our partners the confidence in knowing that we are fully equipped to provide holistic protection across their systems.

GCHQ - Cyber Security Training Certified

At Stripe OLT, the APGM Accredited Trainer status has been achieved for both offensive and defensive cyber security, which means we can deliver robust training courses, focussing on Incident Response, Digital Forensics, Managed Alerting and Penetration Testing.

ADDITIONAL SERVICES

Managed IT Support

At Stripe OLT, our legacy has been built upon exceptional Managed IT Support, and with the continuous growth and transformation of technology, organisations now have a higher expectation of IT services than ever before. Whether you're looking to upgrade from an outdated IT support model or require a highly functioning, multi-channel service desk, our award winning Managed IT Support service will confidently surpass your requirements.

Cloud Telephony

Replace your on-site phone system with one centralised cloud-hub to modernise meetings, enhance collaboration and improve business mobility.

Firewall & Network Infrastructure

Building a successful business requires a solid foundation, and that means efficient and secure services that won't let you down when it counts. Our experts are able to implement secure firewalls and a resilient network infrastructure for your business, to ensure faultless cloud-connectivity at all times.

Managed Cloud Support

With the continuous growth of technology, opting for a Managed Service Provider to support your cloud infrastructure is becoming increasingly popular. So why not place your trust in a Microsoft Gold Partner, so you can focus on growing your business.

Office Moves

Whether you're downsizing your office, adopting a flexible working structure or require larger premises, without a well-defined relocation strategy, the process of moving office can quickly become overly disruptive, adversely affecting productivity, staff engagement and even profitability.
