Digital Transformation

The path to unprecedented growth goes through the cloud, helping organisations connect people, data, and processes in new ways to embrace the possibilities enabled by modern technologies.

To succeed in a digital-first world, business leaders are bringing business and IT closer together and optimising processes to create new value for customers.

Cloud technologies are at the centre of the digital transformation revolution. The cloud has changed more than the way we implement and manage IT; it is changing the very fabric of business. With ready access to data, and intelligent new ways to view, analyse and use the information, the cloud has engendered powerful new capabilities which are disrupting entire business models.

THERE HAS NEVER BEEN A BETTER TIME TO REIMAGINE YOUR FUTURE WORKPLACES

Re-architecting work

Create borderless, accessible workspaces for cross-team collaboration. Enable seamless digital experiences so you can serve your customers without disruption. Improve employee engagement and workplace wellbeing. Build resilience and drive innovation with Paradise's cloud solutions.

Opt for anything from simple secure file storage to complete server and desktop virtualisation. Migrate any of your existing business applications, including accountancy ERP. Add industry-leading productivity tools like Microsoft 365 for a best-in-class employee experience, providing an end-to-end business solution to transform your working environment.

Embrace new ways of working with these hosting options:

1. Paradise Azure Hosting
2. Paradise Professional Hosting
3. Paradise Essential Hosting

"Putting people at the heart of work decisions pays off"

Paradise Azure Hosting

Turn your ideas into solutions faster using trusted, personalised Microsoft Cloud services

Microsoft Azure features an ever-expanding set of cloud services to help your organisation meet your business challenges. Its integrated cloud-computing services include analytics, computing, database, mobile, networking, storage, and web apps. All this leads to moving faster, achieving more, and saving money.

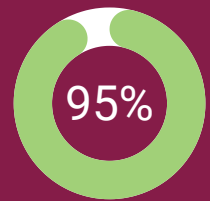

- **Fast app delivery:** Quickly develop, deploy, and manage your apps anywhere with your choice of tools
- **Security:** Ensure the safety and privacy of your apps and data through Azure Backup and Disaster Recovery
- **Better decision-making:** Make strategic decisions using predictive analytics and valuable insights
- **Scalability:** Seamlessly scale up or down with Azure according to your business cycles

- **Ideal for medium to large enterprises, scalable for any number of users**
- **Unlimited storage and performance options**
- **Perfect for hosting all your business data and software applications**

Over 95 percent of Fortune 500 companies trust their business on Microsoft Azure. Speak to us about deploying your applications and solutions in Azure. Call us today on 01604 655900 or email cloud@paradisecomputing.co.uk

Paradise Azure Virtual Desktop (AVD)

A secure remote desktop experience with the latest generation of remote desktop services

Access your desktop and applications from virtually anywhere and help secure your employee and company data by storing in Azure rather than local desktops.

Azure Virtual Desktop (formerly Windows Virtual Desktop) enables secure remote work with the familiarity and compatibility of Windows 10 and Windows 11, providing employees with the same experience as on their local desktop or laptop – whether they're managing their inbox with Outlook, sharing files in OneDrive or collaborating with colleagues on Microsoft Teams.

Receive the best virtualised experience with scalable multi-sessions and save costs by only paying for what you use. AVD can be used with your existing eligible Microsoft 365 or Windows per-user licence.

- **Ideal for any size business**
- **Speed, scalability and familiarity with multi-session windows 10 or 11**
- **Make the most of Azure Hosting with a highly secure and globally accessible workspace with the added advantage that applications can be run remotely from users' machines**

Paradise Professional Hosting

Cloud flexibility and security

Utilising a high standard datacentre, Paradise offers a mid-tier hosting solution for a simple and cost-effective managed cloud solution.

If advanced cloud benefits are not required, our Professional Hosting provides excellent value and performance with a reliability record of over 99% availability.

Paradise Professional Hosting is the first choice for customers with a simple, predictable workload for between 5 and 15 users.

- **Ideal for small and medium enterprises with 5 - 15 users**
- **Provides many of the benefits of larger hosted platforms but at a lower cost**
- **Predictable fixed costs for all aspects including platform, bundled software and Paradise's high-quality technical support**

Paradise Computing is ISO27001:2013 Certified. This Information Security Management System (ISMS) assures you that your assets are protected from misuse, corruption or loss. Secure your critical data, call us on 01604 655900.

3

Paradise Essential Hosting

Cost efficient cloud

Using Paradise's in-house data centre, Essential Hosting represents an ultra-low-cost hosted platform for customers seeking the most economical solution.

A bare-bones hosted solution based on a single-site but still boasting ISO27001 certification, on-site generator power backup and dual internet connections from more than one supplier.

With hosted Windows Server solutions, Essential is ideal as a testing platform, archive storage or backup.

With over 10 years of experience in hosting solutions, and availability of over 99%, you can rely on Essential hosting for your non-business critical workloads.

- **Ideal for smaller enterprises with up to 5 users where cost is a key factor**
- **A basic hosted solution providing cloud-based Windows operation**
- **With good performance, low start-up costs and no early termination penalties, this is a flexible and efficient step towards full cloud hosting**

Reimagine your Employee Experience

COLLECTIVE INTELLIGENCE FOR COLLABORATIVE SUCCESS

Business without boundaries

Cloud Hosting provides a globally accessible workspace for all your users, allowing your employees to be connected and productive, regardless of device and location. No longer just a competitive edge, digital transformation is now critical for building business resilience.

Paradise as your partner

Paradise's highly-trained and experienced technical team focus on your individual business requirements, working as your partner rather than just a supplier.

Our approach is centred around connecting people with technology to streamline workloads, boost productivity through collaboration and increase security. In turn this inspires business growth by enabling a happier workforce ecosystem.

Paradise Computing is Workplace Wellness finalist in the Northamptonshire Chamber of Commerce Business Awards 2021: Creating an environment for employees to succeed through commitment to workforce health and wellbeing. We'd love to do the same for your team. Call us on 01604 655900 today!
