STRIPE OLT

IT RELOCATION & OFFICE MOVES

Whether you're downsizing your office or moving to larger premises, our IT relocation services are for you.

Without a well-defined relocation strategy, the process of moving office can quickly become overly disruptive, adversely affecting productivity, morale and even profitability.

Our award winning team of industry-leading experts will support your business throughout the process, ensuring a seamless transition, with meticulous planning and reliable communication.

Through our technical expertise and long-term strategic planning, we deliver a faultless transition, managing everything from suppliers to installation.

Whether you require us to project manage the entire move on your behalf, or efficiently deliver elements of the transition, we will provide a personalised, cost-effective plan to best align with your company objectives, on time and to budget.

WHO IS IT FOR?

Our office relocation and installation services are for any organisation that requires a premise move. With a focus on end user enablement, we deliver a strategic plan to allow a seamless and efficient transition without penalties such as downtime and disruption.

HOW MUCH DOES IT COST?

Office relocation and installations are costed on an individual project basis. Through partnering closely with your company, we offer personable and cost-effective plans to suit the requirements of your business, aligning with your long-term company goals whilst staying on-budget.

WHY STRIPE OLT?

With over 15 years experience, across a vast range of sectors, our experts have cultivated a deep knowledge of business technology. Our dedicated professionals are trusted to pro-actively secure and protect critical, national infrastructures including NHS trusts, airports, and FTSE 100 financial leaders.

We combine a vast knowledge of IT and security technology, to provide our clients with complete, business technology solutions.

OUR CLIENTS

OUR PARTNERS

At Stripe OLT, we utilise a number of leading technology providers.

As a Microsoft partner, we have instant access to exclusive resources, programs, tools and benefits, that we can pass on directly to our clients.

We work with industry leading network providers, such as exponential-e, to ensure consistent and strong communication.

Cisco Meraki, provide award-winning cloud controlled Wi-Fi, routing and security.

It is central to our success that we establish strong partner relationships, which is why we're also happy to work with your own preferred suppliers, in order to best align with your company and its objectives.

ADDITONAL SUPPORT SERVICES

Back Up and Disaster Recovery

Whilst restoring and protecting data undoubtedly go hand in hand, disaster recovery is about far more than just backup. Not only are there now ever-present cyber-threats growing in complexity each day, it is also important to recognise that data loss can be additionally caused by human error, hardware failure or natural disasters.

Business Continuity

Disaster Recovery's bigger, more strategic brother, Business Continuity requires an in-depth understanding of your business in order to plan how to keep it running in any eventuality.

Device as a Service

If you need new hardware to support your new tech-first workplace, you can eliminate high upfront costs by breaking down your device purchasing into smaller, regular monthly payments with our DaaS solution.
